PROJECT TITLE

Adaptive AI Research Intelligence Platform for Automated Literature Review and Research Gap Discovery

ABSTRACT

The Adaptive AI Research Intelligence Platform is an AI-powered research assistant that automates literature review and research gap discovery. It collects research papers from academic databases, analyzes their content using Artificial Intelligence and Natural Language Processing, generates summaries, identifies key findings and limitations, and suggests potential future research directions. The platform helps researchers save time, organize knowledge efficiently, and discover meaningful research opportunities. Tools & Technologies: React.js, Node.js, Python, Hugging Face Transformers, Sentence Transformers, Gemini API/OpenAI API, FAISS/ChromaDB, Supabase, Semantic Scholar API, OpenAlex API, Crossref API, PyMuPDF/pdfplumber, Recharts/Plotly, JWT/OAuth, Git & GitHub, Vercel, and Render/Railway and for Data Base : Supabase .
